

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Exceeded Maximum Contaminant Level (MCL) for Total Trihalomethanes**

**MCDOWELL COUNTY PSD PREMIER, WV3302411**

*Our water system recently violated a drinking water standard. Although this is not an emergency, you, as our customers have the right to know what happened, what you should do, and what we are doing to correct the situation.*

*We routinely monitor for the presence of drinking water contaminants. Test results for 7/1/2020 and 9/30/2020 show that our system exceeds the standard or maximum contaminant level (MCL) for Total Trihalomethanes.*

The average level of Total Trihalomethanes over the last four quarters was 81.000000000µg/L at 88 BOOKER T STEPHENS WAY location. The standard for Total Trihalomethanes is 80.0µg/L.

**What should I do?**

*You do not need to use an alternative (e.g. bottled) water supply. However, if you have specific health concerns, it is recommended that you consult with your doctor.*

**What does this mean?**

This is not an immediate risk. If it had been, you would have been notified immediately. However, some people who drink water containing *Total Trihalomethanes (TTHM's)* in excess of the MCL over many years may have an increased risk of getting cancer.

**What happened? What is being done?** (Describe corrective action)

*The exceedence is due to turnover issues with tank and low usage from water source. We are overflowing tank periodically and flushing as recommended.*
