

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for

McDowell County PSD Berwind, WV3302435

Our water system violated drinking water monitoring requirements in the year 2019. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the monitoring we did not conduct, how often we are supposed to sample and when the samples should have been taken.

Required Monitoring	Required Monitoring Frequency	Compliance Period
Carbon, Total (Type 27)	Quarterly	4/1/2019-6/30/2019; 10/1/2019-12/31/2019
Disinfectant By-Products: Haloacetic Acids (HAA5) and Trihalomethanes (TTHM) (Type 27)	Quarterly	10/1/2019-12/31/2019
Mercury (Type 03)	Annually	1/1/2019-12/31/2019

What happened? What is being done? (Describe corrective action)

Monitoring requirements were not met due to samples not being collected properly or results not being reported correctly. A state approved water quality monitoring plan has been implemented and data reporting changes have been made to meet requirements.

For more information, please contact Ronald Finley at 304-448-3377 or at PO Box 246, Welch, WV 24801.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for

McDowell County PSD Maybeury, WV3302460

Our water system violated drinking water monitoring requirements in the years 2017 through 2019 and 2021. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the monitoring we did not conduct, how often we are supposed to sample and when the samples should have been taken.

Required Monitoring	Required Monitoring Frequency	Compliance Period
Groundwater Rule: Failure to address deficiencies (Type 45)	By Due Date	8/26/2021
Groundwater Rule: Failure to consult (Type 20)	By Due Date	5/29/2021-6/1/2021
Arsenic, Total (Type 03)	Every 3 years	1/1/2017-12/31/2019

What happened? What is being done? (Describe corrective action)

Monitoring requirements were not met due to samples not being collected properly or results not being reported correctly. A state approved water quality monitoring plan has been implemented and data reporting changes have been made to meet requirements. We are working to address deficiencies in our Sanitary Survey and will provide updated documentation as progress is made.

For more information, please contact Randall Whittaker at 304-297-2622 or at 1350 Airport Rd, Welch, WV 24801.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Exceeded Maximum Contaminant Level (MCL) for Total Trihalomethanes

MCDOWELL COUNTY PSD PREMIER, WV3302411

Our water system recently violated a drinking water standard. Although this is not an emergency, you, as our customers have the right to know what happened, what you should do, and what we are doing to correct the situation.

We routinely monitor for the presence of drinking water contaminants. Test results for 4/1/2022 and 6/30/2022 show that our system exceeds the standard or maximum contaminant level (MCL) for Total Trihalomethanes.

The average level of Total Trihalomethanes over the last four quarters was 85.50µg/L at 88 BOOKER T STEPHENS WAY location. The standard for Total Trihalomethanes is 80.0µg/L.

What should I do?

You do not need to use an alternative (e.g. bottled) water supply. However, if you have specific health concerns, it is recommended that you consult with your doctor.

What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately. However, some people who drink water containing *Total Trihalomethanes (TTHM's)* in excess of the MCL over many years may have an increased risk of getting cancer.

What happened? What is being done? (Describe corrective action)

We had an exceedence on our 2nd Qtr TTHm samples. Our water is purchased from City of Welch, and due to the location and usage of the community the water isn't always fresh. We are flushing and overflowing the tank to allow the older water to get out of the system. We will continue to monitor the status of the TTHms and do all we can to provide quality water.

For more information, please contact JARED R BREWSTER at 304-297-2622
(Contact name) (Phone number)
Or 21901 Rocket Boys Drive, Welch WV 24801
(Mailing address)

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
MONITORING REQUIREMENTS NOT MET FOR**

MCDOWELL COUNTY PSD BARTLEY, WV3302434

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Between 1/1/2022 and 3/31/2022, we failed to submit the required samples as indicated below and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the required monitoring and the compliance period.

Required Monitoring	Compliance Period
27, MONITORING, ROUTINE (DBP), MAJOR Failure to monitor for Haloacetic Acids (HAA5's)	1/1/2022 to 3/31/2022

What happened? What is being done? (Describe corrective action)

A mistake was made while filling out the sample paperwork resulting in the incorrect address being recorded. Therefore, the samples that were pulled didn't count. We have continue to monitor the HAA5 samples and made a correction to not have this happen again.

For more information, please contact JARED R BREWSTER at 304-297-2622
(Contact name) (Phone number)
 or 21901 Rocket Boys Drive Welch WV 24801
(Mailing address)
